

# ECO S EVI

ECO S EVI is a new linear luminaire for generic lighting. It has a streamlined design language and a high level of environmental tolerance (IP65 & IK08) for a demanding usage environment. The luminaire is available in a range of different length, power and light distribution options for various environments. Several surface treatment options are available for different environments from industrial premises to premises that require cleanliness. The D classification of the luminaire enables installation even in dusty environments.

The luminaire's pressure equalisation is based on a replaceable Gore filter, ensuring that the pressure-balancing air is kept clean in a controlled manner and protecting the internal parts of the luminaire from dust and dirt.
