

EPSILON L

Epsilon L is a thin and unobtrusive minimalistic luminaire model. The luminaire is not too dominant visually but blends in well with the rest of the architecture. Epsilon L enables the creation of high-quality and non-dazzling indirect/direct 60/40 lighting. The luminaire is available in 1,200 mm and 1,500 mm sizes as well as in two different power versions. Can also be implemented as a line luminaire solution.

Benefits

The luminaire has good opening angles for downlight (80°) and uplight (140°). Available in on/off and DALI versions. Easy to install.

Suitability

Wire suspension installation. Can also be installed as a line luminaire solution because of ready installed quick connectors for power and DALI.
