

# OMEGA LINEAR GEN2

Cost-efficient lighting ideal for stores, production facilities, indoor sports facilities and indoor storages. The sleek luminaire provides spectacular light for both low and high spaces.

The LED-specific optics enable high luminous efficacy. Continuous installation ensures the smallest possible carbon footprint for the overall solution.

## Benefits

The Omega Linear Gen2 luminaire has low UGR glare values, and the LED-specific optics ensure the best luminous efficacy.

The steel frame is available as zinc coated (default) or white (RAL 9010, option).

The luminaire is always equipped with a DALI driver and is available as an on/off solution, with CLO programming or wireless Casambi control.

This luminaire can be installed with lighting suspension tracks, wire brackets, rail brackets, ceiling surface brackets or as continuous installation, and it can be equipped with Wago Winsta, EnstoNet or Wieland cables at delivery. The luminaire does not require opening during installation, and the wires and cables can be hidden in the indentation on the frame.

## Suitability

Ideal lighting for stores, production facilities, indoor sports facilities and indoor storages. Diverse selection of different optics.
